MARINE RENEWABLE ENERGIES (MRE)

www.ett-hvac.com

ETT, France's leading supplier of air conditioning and pressurisation solutions for offshore wind substations (oss).

Energie Transfert Thermique is an industrial manufacturer, based on the Brittany coast, which has been designing and manufacturing high-performance thermal machines since 1979. **ETT** has positioned itself as a recognised player in this market thanks to its referencing at various **EPCs (Engineering Procurement Construction) and shipyards.**

ETT at a glance

Founded in **1979**

Turnover in 2025 **€83 million**

Employees in 2025 **400**

Units installed in OSS **280**

Specific units for the MRE market

Pressurisation Air Handling Unit (AHU)

Skid compressor

AG3 aluminium Air Conditioning Unit (ACU)

AIR COOLED CONDENSER (ACCU)
316 L stainless steel

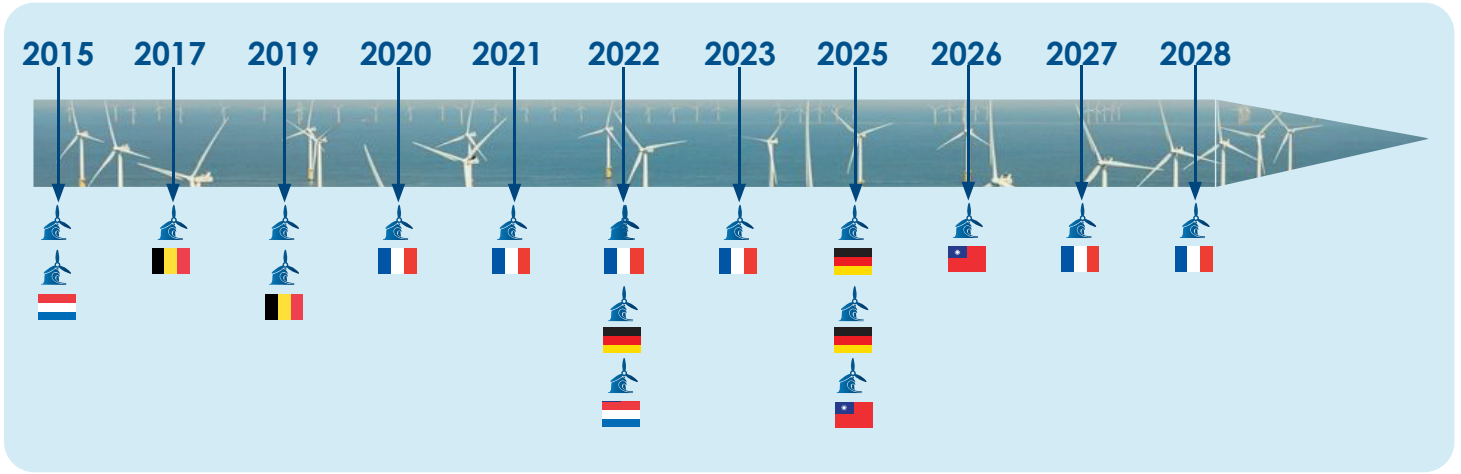

316L Stainless steel casing

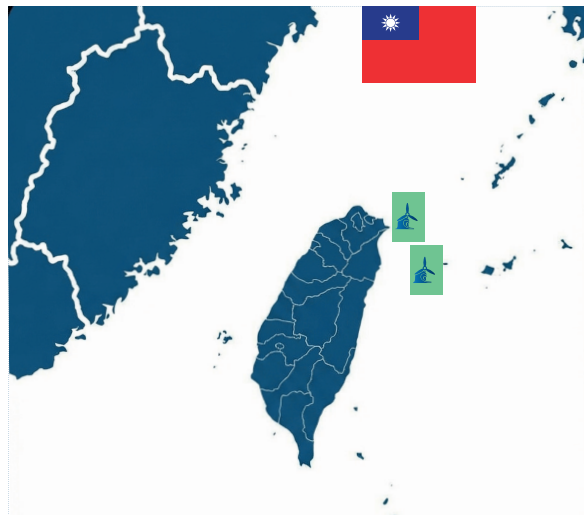

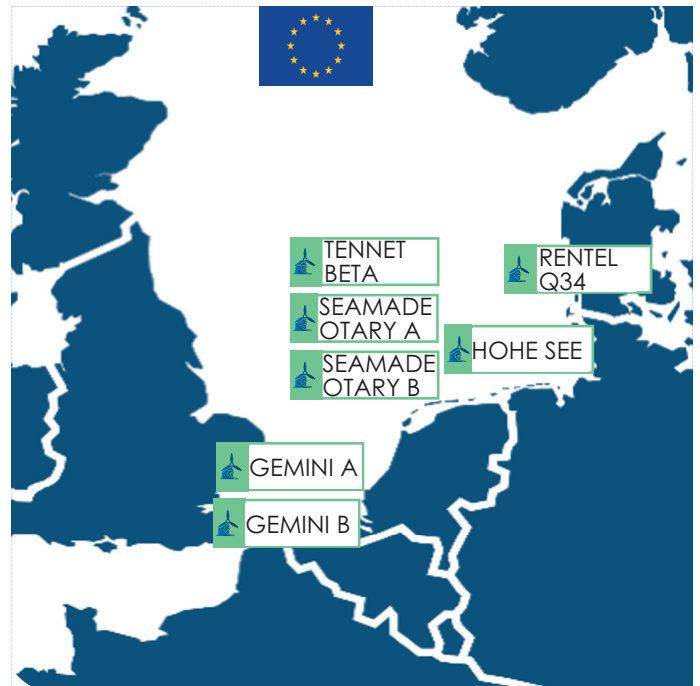

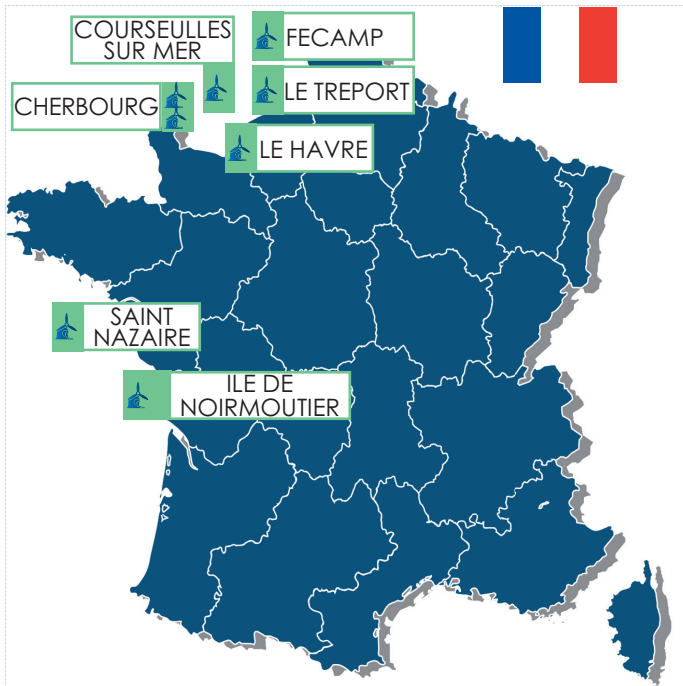

AIR COOLED CONDENSER (ACC)
316 L stainless steel

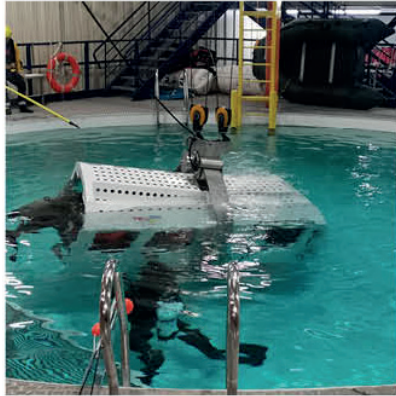

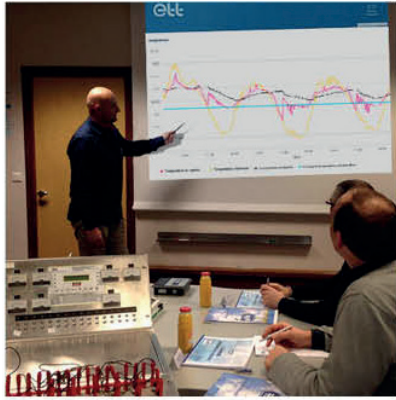

17 substations manufactured worldwide

Selected References for the MRE market

ETT services dedicated to applications in the MRE market

Manufacturer audits

- Assessment of the plant's condition
- Advice and recommendations
- Improved **performance** and durability
- Additional maintenance

Optimisation & Retrofit

- Regulatory upgrades
- **Energy optimisation**
- Development of applications
- Controls - Communication
- **Energy recovery**
- Continuous dehumidification

Manufacturer's Service Contract

- Technical maintenance operations
- Regulatory upgrades
- Optimised settings
- Replacement of consumables
- Service provided by GWO certified technicians

Spare parts

Training

- ETT, **an accredited training organisation**, Qualiopi certified
- Training in the **operation** and **maintenance** of the machines
